

**Customers who wish to collect their own goods or arrange their own collection are welcomed here at ecodek®. However, there are several strict provisions that must be observed. In the UK every year over 4,000 successful prosecutions for unsafe loads are brought against drivers and operators.**

One of the most critical aspects of the order process is ensuring that the appropriate transport is employed to suit both the load and destination. Our Sales Team run through a number of questions with customers to make sure the own collection will run smoothly, and these are repeated on the Sales Order Acknowledgment emailed to each customer at the time of placing the order.

Please bear in mind when planning your own collection both ecodek® and our customers have a **legal obligation** to ensure only suitable vehicles and securing equipment are used and that under the road traffic act 1988 section 40A, a person is guilty of an offence if he uses or permits another to use, a motor vehicle or trailer on a road when the weight, position or distribution of its load, or the manner in which it is secured, is such that the use of the motor vehicle or trailer presents a danger of injury to any person.

ecodek® will only load goods onto a suitable wagon, flatbed trailer or pickup this is providing the overhang does not exceed 1m and is clearly flagged and that the maximum load carrying capacity is not exceeded.

**We will not load at an angle over the HEADBOARD of any vehicle or on ROOF RACKS please see unacceptable examples below.**

**We will always help and advise where possible but our loading staff are under strict instructions to refuse to load any vehicle they consider unsuitable or dangerous therefore recommend you check with our Transport Department before committing or arriving at site.**
