

Balconies *Prime Place, London*

It is safe to say that at this precise moment Greenwich, South London is the biggest site in Britain for construction and although it may be at the bottom of the map it's certainly at the top of the game when it comes to this area.

One of the most prestigious and most impressive of the sites in Greenwich is the Prime Place Luxury Development, located right at the heart of Royal Greenwich.

This puts the development in a prime location, mere walking distance from Canary Wharf and the rest of the Capital yet still providing a peaceful and idyllic setting, away from the hustle and bustle of the big city, due to the quaint and cobbled streets that surround it. When completed, the development will feature a number of gorgeous 1, 2 and 3 bedroom apartments and it is with great pleasure that we at ecodek are able to announce that we have supplied the materials for several of the balconies that will be used as a major selling point for said-apartments.

Ecodek secured a deal to supply the site with just over 6 tonnes of our Reversible Deck Boards in beautiful Pebble Grey. Citing our products durability, ease of use and thoroughly pleasing visual appearance, **ecodek®** was the perfect choice for the job. The project has been a roaring success!
